Segmentation (as per Financial Announcements) of results is provided on the basis of business categories as shown below.

Semiconductor production equipment (SPE) business

This business handles manufacturing and inspection equipment such as wafer probing machines, wafer dicing machines, and other machines used in the semiconductor manufacturing and testing process. In this business, the Company is responsible for the primary production elements. Our subsidiary Tosei Engineering Corp is responsible for production of other related products. Sales and post-sales service is carried out primarily by the Company and software is provided by our subsidiary Tosei Systems Co., Ltd.

For overseas sales, in addition to exports by the Company, sales are conducted in north America by our subsidiary Accretech America Inc., in Europe by our subsidiary Accretech (Europe) GmbH, and in Asia by our subsidiaries such as Accretech Korea Co., Ltd., Accretech (China) Co., Ltd., and Accretech Taiwan Co., Ltd.

<Major affiliates>

Tosei Engineering Corp., Tosei Systems Co., Ltd., Accretech America Inc., Accretech (Europe) GmbH, Accretech Korea Co., Ltd, Accretech (China) Co., Ltd., Accretech Taiwan Co., Ltd., and Accretech (Malaysia) Sdn Bhd.

Metrology business

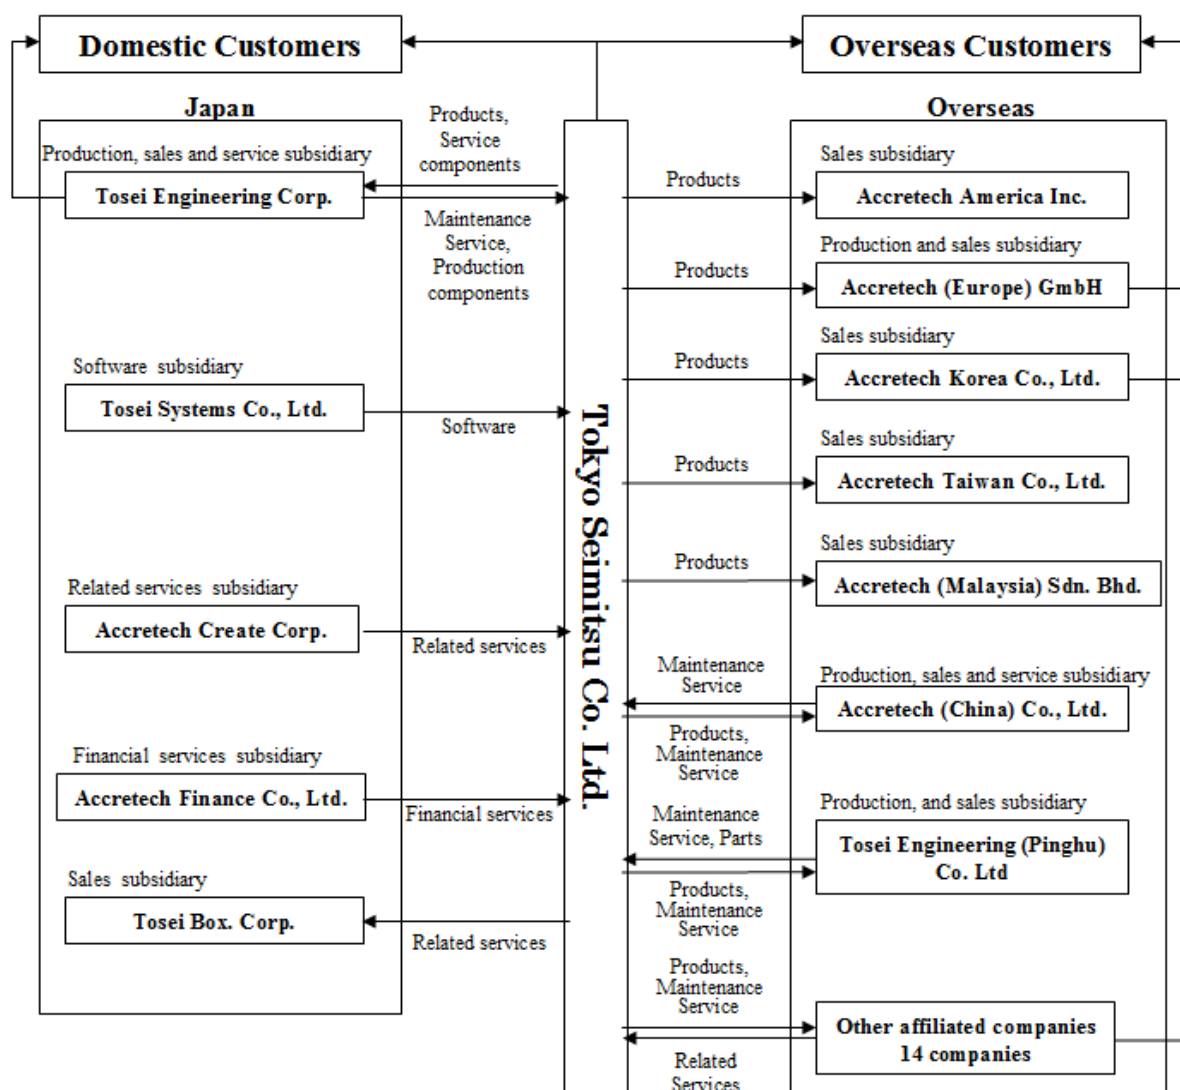

This business handles 3D coordinate measuring machines, surface texture and contour measuring systems, and other precision measuring systems. For this business, the Company and Tosei Engineering Corp. are responsible for the production and primary elements of sales and our subsidiary Tosei Systems Co., Ltd. provides software. Certain related products are manufactured by Tosei Engineering (Pinghu) Co., Ltd. and Tosei (Thailand) Co., Ltd.

For overseas sales, in addition to exports by the Company and Tosei Engineering Corp, sales are conducted in Europe by our subsidiary Accretech (Europe) GmbH and in China by our subsidiary Accretech (China) Co., Ltd.

<Major affiliates>

Tosei Engineering Corp., Tosei Systems Co., Ltd., Accretech (Europe) GmbH, Accretech (China) Co., Ltd., Tosei Engineering (Pinghu) Co., Ltd, and Tosei (Thailand) Co., Ltd.

Section 2 [Business Overview]

1 [Overview of business results]

(1) Operating results

Overall business conditions in the Fiscal Year 2014 ended March 31st, 2014 can be described in the following way. A moderate recovery trend continued in Japan corresponding with improvement in corporate profits and an increase in private consumption underpinned by the correction of the high Japanese Yen and revalued stock prices prompted by monetary and economic policies of the government and Bank of Japan. A similar continuous recovery was seen in the USA accompanied by strong private consumption and improvement in corporate performance and the employment market. There has been a respite in the debt crisis and a slight recovery in the European economies from recent lows. Economic growth in emerging Asian countries such as China, however, continued to decrease with decelerating exports and excess capacity pointing to over investment in the industrial sector.

In line with the conditions outlined above, Consolidated Sales in the Fiscal Year 2014 (April 1st, 2013 – March 31st, 2014) was ¥55.268 billion (up 8.3% YoY), Operating Income was ¥8.466 billion (up 12.8% YoY), Ordinary Income was ¥9.024 billion (up 14.3% YoY) and Net Income was ¥5.858 billion (up 46.6% YoY).

Business results during the term in each segment were as follows.

A. SPE business

In the SPE business segment, the Back-End-of-Line Equipment business, to which our products belong, has been influenced by the market demand for end-products in recent years. The demand for memory devices has grown throughout this fiscal year, driven by data server centers backing increasing cloud computing and the use of “Big Data”. Smartphones and Tablet PCs, which are shifting to low-end models for emerging countries, continue to be the driver of the market, but with intense fluctuations. As a result, we have seen a similar cycle in short term demand as in past years, namely strong demand for our products until the middle of Summer, then continuous low-level demand from Autumn, and then sudden & fast recovery in the final period.

As a result, Sales was ¥31.360 billion (up 6.5% YoY), and Segment Profit (Operating Income) was ¥3.720 billion (up 31.4% YoY).

B. Metrology business

The automobile industry, which is the major user of our products, has continued to establish world-wide production structures, back grounded by increasing overseas demand. The machine tools sector, which had adjusted production schedules, began to recover mainly for the same reason. Government policies to provide financial support for the investment of domestic small and medium enterprises, has also had a notable effect.

As a result, Sales was ¥23.908 billion (up 10.9% YoY) and Segment Profit (Operating Income) was ¥4.745 billion (up 1.5% YoY).

Note: The above amounts are exclusive of consumption tax.

(2) Cash flows

Cash and cash equivalents as at March 31st, 2014 amounted to ¥20.411 billion, an increase of ¥2.107 billion during FY2014. The cash flows for each type of activity (operating activities, investment activities, and financing activities) compared to the previous fiscal year are shown below.

Cash and cash equivalents earned from operating activities (amount of positive cash flow) significantly decreased from ¥8.337 billion in FY2013 to ¥6.434 billion in FY2014. This was primarily due to the fact that while Income (or loss) before income taxes and minority interests increased from ¥5.807 billion to ¥9.090 billion in FY2014, this was partially offset by Change in trade notes and accounts receivable moving from a decrease of ¥4.246 billion in FY2013 to an increase of ¥4.182 billion in FY2014.

Cash and cash equivalents used in investment activities decreased from ¥3.019 billion in FY2013 to ¥1.374 billion in FY2014. This included a negative cash flow of ¥1.0 billion in Payment for assignment of business in FY2013, which was not accounted in FY2014.

Net cash used in financing activities significantly decreased from ¥4.322 billion in FY2013 to ¥3.244 billion in FY2014 mainly due to a decrease of Repayment of long-term debt from ¥3.200 billion in FY2013 to ¥2.500 billion in FY2014.

2 [Production, orders, and sales]

(1) Actual Production

The production results for each business segment in FY2014 are shown below.

Business segment	Production (Millions yen)	YoY (%)
SPE business	27,249	7.1%
Metrology business	22,617	8.4%
Total	49,866	7.6%

Notes: 1. The above production results are based on the sales prices.

2. The above amounts are exclusive of consumption tax.

(2) Orders received

The orders received for each business segment in FY2014 are shown below.

Business segment	Orders received (Millions yen)	YoY (%)	Order backlog (Millions yen)	YoY (%)
SPE business	33,434	11.6%	9,349	28.5%
Metrology business	24,257	9.4%	5,516	6.7%
Total	57,692	10.7%	14,866	19.5%

Note: The above amounts are exclusive of consumption tax.

(3) Actual Sales

The sales amounts for each business segment in FY2014 are shown below.

Business segment	Sales (Millions yen)	YoY (%)
SPE business	31,360	6.5%
Metrology business	23,908	10.9%
Total	55,268	8.3%

Notes: 1. The sales amounts for each major customer and their ratio to total sales are omitted because there are no customers with sales amounts that account for 10% or more of total sales.

2. The above amounts are exclusive of consumption tax.

3 [Issues for the Company and the Group]

(1) Establishing profitable structure

Tokyo Seimitsu Group has dramatically reorganized itself in order to galvanize in the face of the global recession and reestablish itself for the future growth. The reorganization and reestablishment, including product quality improvement and innovation of manufacturing, have obtained excellent business results. The Group will continue to proceed with its growth strategy to achieve further improvements in business results.

(2) Continuous profit distribution

Company management is acutely aware that continuous dividend payments remain a key indicator of business success and thorough business recovery.

(3) Strengthening corporate governance

While corporate governance and risk management have become increasingly important, Tokyo Seimitsu Group will endeavor to strengthen its corporate governance by maintaining effective internal control systems and a proper compliance management system, thereby ensuring sound and transparent management.

(4) Globalization

Since the sales organization has been fully localized in each region and the Company Group overseas sales have exceeded domestic sales, the Company Group has commenced local manufacturing such as in China and Thailand. With this note, the Company Group will optimize management organization for its global operations through actions such as hiring local management executives, building/enhancing global infrastructure, establishing localized supply chains, and standardizing management information flows to and from Head Office.

4 [Business and other risks]

Risk factors that may affect the Tokyo Seimitsu Group's business results, financial position, cash flows and other performance indicators are described below.

The Group is endeavoring to avert these risks and to reduce potential risks by hedging and diversifying. However, an unforeseen situation may have considerable influence on the Group's business performance.

Any future forecasts included in the following descriptions are based on the estimates or judgment of the Group as at the end of FY2014.

(1) Fluctuations in market conditions

The Tokyo Seimitsu Group conducts SPE business and Metrology business on a global scale. Both of these business areas, as promising sectors in the development of an advanced information society, are expected to continue to grow. However, if the supply-demand balance is disturbed or economic conditions deteriorate in the markets of each business area, the Group's business performance could be adversely affected.

(2) Product development

The business field in which the Group operates is one in which revolutionary new technologies are developed and accumulated on a daily basis. Efforts aimed at developing advanced technologies and creating products based on them are an absolute necessity in order to strengthen and maintain competitiveness. However, there always remains the possibility that the results of research and development by the Group may not suit the demands of the market.

(3) Fluctuation in foreign currency exchange rates

In principle, the Group's overseas sales are made on a Japanese Yen basis. However, transactions are carried out in U.S. dollars with customers in the United States and some other regions and/or users. For receivables denominated in U.S. dollars, foreign currency risks are hedged using forward agreements and other methods, and whenever possible the transaction contracts themselves are changed to yen denominations. Nevertheless, in the event of unforeseen exchange rate fluctuations, the Group's business results may be influenced.

(4) Protection of intellectual property rights

The Tokyo Seimitsu Group's SPE and precision Metrology equipments embody cutting edge technologies. Particular attention is paid to the protection of rights related to these technologies. Specifically, the Group has taken measures to defend its interest with regard to such matters as attribution of patent-related rights and protection of trademarks and brands. However, if a lawsuit or other legal dispute with a third party in Japan or overseas were to arise concerning rights, the Group's business performance could be affected.

(5) Natural disasters, accidents, and other unforeseen events

In order to minimize damage caused by a possible interruption of production activities, the Tokyo Seimitsu Group especially conducts disaster prevention inspections and carries out routine production facility maintenance. Capital investment is also made to secure the safety of the facilities. Nevertheless, a sudden calamity, natural disaster or unforeseen accident could damage production facilities or interrupt operations, greatly impacting the Group's business performance.

(6) Country risk

Because the Company and the Group conduct operations on a global scale, business is conducted in a manner best suited to the laws and regulations of each individual country. However, there is the possibility that an unexpected change in the laws or regulations of a particular country may affect consolidated operating results. In addition, there is the possibility that unpredictable events such as acts of terrorism, wars, and events of natural catastrophes may also impact consolidated operating results.

There are no notable contracts.

6 [R&D Activities]

The R&D activities of the Group are carried out primarily at the Company. They cover the full range of SPE products and measuring instrument products. Through these activities, we carry out basic research aimed at long-term growth, product improvements to boost the competitiveness of existing products, and the development of new product models.

The total amount of R&D costs for the Group in FY2014 was ¥4.979 billion. A description of the specific activities in each business segment is provided below.

a. SPE business

In the SPE field, as the trends toward higher-precision LSI with finer structures and toward larger diameter wafers continue, the equipment at our customer companies is becoming increasingly diversified, as these companies pursue automation, higher precision, higher performance, and higher reliability in order to improve production yields and throughput. In recent years, significant advancements have been made in terms of higher wafer densities, multiple wafer layers, and thinner wafer sizes needed to accompany these finer structures. The Group is working for rapid development of next-generation devices in order to meet these market needs.

The major research and development results from FY2014 include “Probing machine performance improvement”, “Blade dicing machine performance improvement”, and “Development of equipment for TSV”.

The total amount of R&D costs for this business area in FY2014 was ¥4.087 billion.

b. Metrology business

As our customers continue to rationalize their production processes and implement factory automation, there are increasing demands for lower prices, in addition to demands for higher precision measurement accuracy and functionality. We are working to develop and improve a range of products to meet these needs.

The major research and development results from FY2014 include “The development of SVA3”, “The development of optical measuring instruments” and “Analysis software ACCTee performance improvement.”

The total amount of R&D costs for this business area in FY2014 was ¥891 million.

7 [Analysis of financial position and operating results, and Cash Flow]

(1) Significant accounting policies and estimates

The consolidated financial statements of the Group are prepared in accordance with accounting principles generally accepted in Japan. When preparing the consolidated financial statements, we perform specific estimates which are necessary for calculations such as assets and liabilities at the end of the consolidated fiscal year, and income and expenses during the consolidated fiscal year. These estimates were performed for inventories, allowance for bad debts, deferred tax assets, investment securities, cost of sales, employee retirement benefit expenses, and other items. These estimates are based on past results with consideration for future expectations, and are performed with an emphasis on sustainable, rational, and conservative evaluation.

(2) Analysis of financial position for FY2014

The financial position of the Group at the end of FY2014 consisted of total assets in the amount of ¥82.565 billion (¥55.865 billion in current assets and ¥26.699 billion in fixed assets), liabilities in the amount of ¥17.896 billion, and total net assets of ¥64.668 billion.

[1] Assets

Although Inventories in FY2014 have decreased from the end of FY2013, both Cash and cash equivalents and Trade notes and accounts receivable have increased during the term. Consequently, Total assets in FY2014 have increased ¥4.703 billion from the end of FY2013.

[2] Liabilities

Total Liabilities in FY2014 have decreased by ¥2.661 billion from the end of FY2013, primarily because of repayment of interest-bearing debts such as long-term debts.

[3] Net assets

Total net assets in FY2014 have increased by ¥7.364 billion from the end of FY2013, primarily because of net profits and an increase in Accumulated other comprehensive income from increased stock price and depreciation of the Japanese Yen.

(3) Analysis of operating results for FY2014

[1] Sales

Sales for FY2014 were ¥31.360 billion for the SPE business and ¥23.908 billion for the Metrology business, with a combined total of the two businesses of ¥55.268 billion. Business results in FY2014 have increased from the previous Fiscal year because of firm demand consistent with worldwide, moderate recovery trends.

[2] Cost of sales, selling and general administrative expenses

Cost of sales for FY2014 was ¥34.845 billion and the Selling and general administrative expenses were ¥11.956 billion. The ratio of the cost of sales to total sales in FY2014 slightly decreased from 64.8% in FY2013 to 63.0%. On the other hand, the ratio of the selling and general administrative expenses to total sales in FY2014 increased from 20.5% in FY2013 to 21.6%. This was due to an increase in research and development.

[3] Operating income

As results of [1] and [2] above, operating income for FY2014 was ¥8.466 billion.

[4] Non-operating income and expenses

Non-operating income for FY2014 was ¥626 million mainly from Foreign exchange income as a result of Yen depreciation and Reversal of allowance for doubtful accounts.

Non-operating expenses for FY2014, mainly from Interest expenses, decreased to ¥68 million after reduction of interest-bearing debts.

[5] Ordinary income

As recorded above, Ordinary income for FY2014 was ¥9.024 billion.

[6] Extraordinary gains and losses

Extraordinary gains in FY2014 were ¥79 million, mainly because of Gain on sales of investment securities. Extraordinary losses were ¥12 million because of Loss on liquidation of subsidiaries.

[7] Income before income taxes and minority interests

As a result, Income before taxes and minority interests for FY2014 was ¥9.090 billion.

[8] Income taxes

Income taxes and others in FY2014 were ¥3.201 billion and the ratio to income before income taxes and minority interests was 35.2%.

[9] Minority interests

Minority interests in FY2014 were ¥30 million.

[10] Net income

As a result of the above, Net income for FY2014 was ¥5.858 billion.

(4) Analysis of Cash Flow for FY2014

FY2014 Cash and cash equivalents earned from operating activities were ¥6.434 billion of positive cash flow, used in investing activities was ¥1.374 billion of negative cash flow, and used in financing activities was ¥3.244 billion of negative cash flow. As a result, Cash and cash equivalents at the end of FY2014 increased by ¥2.107 billion to ¥20.411 billion. This was primarily due to factors including Income before income taxes and minority interests from operating activities, Payment for purchase of tangible fixed assets from investment activities, and Repayment of long-term debt from financing activities.

(5) Factors having important effects on the operating performance

Both the SPE and Metrology industries, which are the primary fields of activity for the Group, are industries with a fast pace of technological innovation and with intense competition, producing high-level technological demands. The industry which our customers operate in is the semiconductor industry, which regularly experiences cycles of expansion and contraction on a large-scale. The performance of the Group has been affected by these cycles many times in the past. In this environment, our most important tasks are to constantly develop new products and to continue creating a highly competitive product lineup which can keep the effects of market volatility to a minimum.

(6) Medium- and long-term management strategies

The Company builds cooperative Win-Win relationships with domestic and overseas companies and individuals that share a common goal. Behind all our efforts is the goal of being a truly global company. To accomplish this goal, the Company will concentrate resources into selected products targeting each business segment.

In recent years, the Company Group's overseas sales have exceeded domestic sales. Therefore, sales organization has been fully localized in each region, and such as in China and Thailand, local manufacturing has commenced. The Company Groups will optimize management organization for its global operations through actions such as hiring local management executives, establishing localized supply chains, and standardizing management information flows to and from Head Office.

Section 3 [Equipment and Facilities]

1 [Overview of capital expenditures]

Capital expenditures of the Group are primarily centered on production equipment in both the SPE business and metrology business, in order to expand future business opportunities and product differentiation versus competitors, and are aimed at rationalizing and labor-saving.

The total amount of capital expenditures in FY2014 was ¥1.803 billion. An overview of this investment by business segment is provided below.

(1) SPE business

Capital expenditures in this business during FY2014 were conducted primarily in preparation for expanding production of existing products, and for re-engineering production lines to be available to respond quickly to the market situation and customer needs in a timely manner.

The primary contents of this investment were ¥199 million for purchase of a 5-axis Machining Center, ¥118 million for purchase of TSV equipment and ¥95 million for purchase of a Horizontal Machining Center. Total capital expenditures in this business during FY2014 were ¥874 million.

(2) Metrology business

Capital expenditures in this business during FY2014 were conducted primarily in preparation for expanding production, and also aimed at achieving cost reductions and constructing efficient and flexible production lines.

The primary contents of this investment were ¥538 million for construction of the Company's subsidiary, Tosei Engineering's Kita-Kandatsu C Plant and ¥34 million for purchase of a Precision combination lathe. Total capital expenditures in this business during FY2014 were ¥929 million.

Notes:

- The number of shares issued upon the exercise of the share subscription rights (hereafter referred to as “Number of Shares Granted”) is 100. Meanwhile, the Number of Shares granted may be adjusted by following adjustment methods.

(Adjustment of the Number of Shares Granted)

If the Company conducts a stock split or reverse stock split, the Number of Shares Granted shall be adjusted according to the following formula, with resulting fractions less than 1 share to be rounded down.

Adjusted Number of Shares Granted

= Number of Shares Granted before adjustment × Stock split (or reverse stock split) ratio

In addition, if another unavoidable circumstance which requires adjusting the Number of Shares Granted occurs, the Number of Shares Granted shall be adjusted within a reasonable range with consideration for the various conditions extant at the time.

- The amount to be paid by the holders upon the exercise of each share subscription right shall be the amount calculated by multiplying the amount to be subscribed per share (hereafter the “Exercise Price”) for the Company’s shares of common stock that may be issued upon the exercise of share subscription rights by the number of shares granted. However, if any of the cases below takes places, the Exercise Price shall be adjusted by applying the following formulas, with resulting fractions less than one yen to be rounded up.

- (1) A stock split or reverse stock split of the Company stock occurs.

$$\text{Adjusted Exercise Price} = \text{Exercise Price before adjustment} \times \frac{1}{\text{Stock split (or reverse stock split) ratio}}$$

- (2) If the Company issues shares of new common stock or disposes of its treasury stock at prices less than the then-current market price (excluding the exercise of share subscription rights).

$$\text{Adjusted Exercise Price} = \text{Exercise Price before adjustment} \times \frac{\frac{\text{Number of shares already issued} + \text{Number of new shares to be issued (disposed of)}}{\text{Market price}} \times \text{Issue (disposal) price per share}}{\text{Number of shares already issued} + \text{Number of new shares to be issued}}$$

- (3) If another unavoidable circumstance which requires adjusting the Exercise Price occurs, the Exercise Price shall be adjusted within a reasonable range with consideration for the various conditions extant at the time.

3. The amount of capital increase occurring when shares are issued upon exercise of a share subscription right shall be 1/2 of the capital increase limit as calculated according to Article 17, Item 1 of the Corporate Calculation Rules, with resulting fractions less than one yen to be rounded up.

4. In the event that the Company experiences a merger (only if the company is eliminated as a result of the merger), absorption-type company split or incorporation-type company split (in each case only if the Company becomes a split company), or stock swap or stock transfer (in each case only if the Company becomes a wholly owned subsidiary) (the above events hereafter collectively referred to by the general term “Structural Reorganization”), then the holders of share subscription rights remaining at the time the Structural Reorganization takes effect (hereafter referred to as “Remaining share subscription rights”) shall be provided with share subscription rights based on the conditions below for the public company as indicated in Article 236, Item 1, Number 8, (a) - (e) of the Corporation Law of Japan (hereafter referred to as “Reorganized Company”).
- However, the provision of share subscription rights for the Reorganized Company in accordance with the conditions below shall occur only when such provision is specified in the absorption-type merger agreement, incorporation-type merger agreement, absorption-type split agreement, incorporation-type split plan, stock swap agreement, or stock transfer plan.
- (1) Number of share subscription rights for the Reorganized Company to be provided
The number of provided share subscription rights shall be the same as the number of Remaining share subscription rights possessed by the holder of the Remaining share subscription rights.
 - (2) Type of Reorganized Company shares issued upon exercise of the share subscription rights
The issued shares shall be common stock of the Reorganized Company.
 - (3) Number of Reorganized Company shares issued upon exercise of the share subscription rights
The number of issued shares shall be determined in accordance with “Number of shares issued upon exercise of stock acquisition rights” in the table above, with consideration for the conditions and other details of the Structural Reorganization.
 - (4) Amount to be paid by the holder of the share subscription right upon exercise of that right
The amount to be paid by the holder of the provided share subscription right upon exercise of that right shall be the amount calculated by multiplying the post-reorganization paid-in amount (determined by adjusting the Exercise Price with consideration for the conditions and other details of the Structural Reorganization) by the number of Reorganized Company shares issued upon exercise of the stock acquisition rights as determined according to (3) above.
For the post-reorganization paid-in amount of share subscription rights provided as stock-based compensation, the amount shall be 1 yen per share of the Reorganized Company.
 - (5) Period in which the share subscription rights can be exercised
The period shall be from either the later of the start date determined in “Exercise period for share subscription rights” above or the date on which the Structural Reorganization took effect until the end date determined in “Exercise period for stock acquisition rights” above.
 - (6) Restrictions on acquisition of share subscription rights by transfer
The acquisition of share subscription rights by transfer requires approval by a resolution of the Reorganized Company Board of Directors.
 - (7) Provisions for acquisition of the share subscription rights
This shall be determined in accordance with “Items related to the provisions for acquisition of share subscription rights” above.
 - (8) Other conditions concerning exercise of the share subscription rights
These shall be decided in accordance with “Conditions for exercise of the share subscription rights” above.
5. If any of resolutions (1) - (5) listed below is approved by a General Meeting of Shareholders of the Company or, when a resolution of the General Meeting of Shareholders is not required, if a resolution by the Board of Directors or decision by a representative executive officer occurs, the Company shall be permitted to acquire share subscription rights at no cost on the date decided separately by the Board of Directors.
- (1) A resolution approving a merger agreement by which the Company becomes an extinct company
 - (2) A resolution approving a split agreement or split plan by which the Company becomes a split company
 - (3) A resolution approving a stock swap agreement or stock transfer plan by which the Company becomes a wholly owned subsidiary
 - (4) A resolution approving a change in the articles of incorporation in order to require approval by the Company for acquisition by means of stock transfer of any shares issued by the company
 - (5) A resolution approving a change in the articles of incorporation in order to require approval by the Company for acquisition by means of stock transfer of shares which were issued by the company upon exercise of share subscription rights, or in order for the Company to acquire all of this class of stock pursuant to a resolution by the General Meeting of Shareholders.
6. (1) The share subscription rights can only be exercised when the holder of the share subscription rights has lost his/her position as a director of the Company (including executive officers of companies with a committee system of corporate governance) or executive officer. However, the share subscription rights can be exercised only during the period from the date following the day on which the holder of the share subscription rights lost his/her position (hereafter referred to as the “Right Exercise Start Date”) until the day when 7 days have passed after the Right Exercise Start Date (or if that day is not a business day, the preceding business day).
- (2) In the event that the holder of the share subscription rights dies, the heirs of the holder may exercise the share subscription rights. However in this case, the share subscription rights can be exercised only during the period from the date following the next date of the holder’s death until the day when 6 months have passed from this date (or if that day is not a business day, the preceding business day).

If the Company conducts a stock split or reverse stock split, the Number of Shares Granted shall be adjusted according to the following formula, with resulting fractions less than 1 share to be rounded down.

Adjusted Number of Shares Granted

= Number of Shares Granted before adjustment × Stock split (or reverse stock split) ratio

In addition, if another unavoidable circumstance which requires adjusting the Number of Shares Granted occurs, the Number of Shares Granted shall be adjusted within a reasonable range with consideration for the various conditions extant at the time.

- The amount to be paid by the holders upon the exercise of each share subscription right shall be the amount calculated by multiplying the amount to be subscribed per share (hereafter the “Exercise Price”) for the Company’s shares of common stock that may be issued upon the exercise of share subscription rights by the number of shares granted. Exercise Price shall be the higher of 1) averaged share price, which shall be calculated from the closing price of the shares at Tokyo Stock Exchange each day for a month before the month of exercise, or 2) closing price of the shares on the day before the day of exercise, multiplied by 1.025. However, if any of the cases below takes places, the Exercise Price shall be adjusted by applying the following formulas, with resulting fractions less than one yen to be rounded up.

- (1) A stock split or reverse stock split of the Company stock occurs.

$$\text{Adjusted Exercise Price} = \text{Exercise Price before adjustment} \times \frac{1}{\text{Stock split (or reverse stock split) ratio}}$$

- (2) If the Company issues shares of new common stock or disposes of its treasury stock at prices less than the then-current market price (excluding the exercise of share subscription rights).

$$\text{Adjusted Exercise Price} = \text{Exercise Price before adjustment} \times \frac{\frac{\text{Number of shares already issued} + \text{Number of new shares to be issued (disposed of)} \times \text{Issue (disposal) price per share}}{\text{Market price}}}{\text{Number of shares already issued} + \text{Number of new shares to be issued}}$$

- (3) If another unavoidable circumstance which requires adjusting the Exercise Price occurs, the Exercise Price shall be adjusted within a reasonable range with consideration for the various conditions extant at the time.

- In the event that the Company experiences a merger (only if the company is eliminated as a result of the merger), absorption-type company split or incorporation-type company split (in each case only if the Company becomes a split company), or stock swap or stock transfer (in each case only if the Company becomes a wholly owned subsidiary) (the above events hereafter collectively referred to by the general term “Structural Reorganization”), then the holders of share subscription rights remaining at the time the Structural Reorganization takes effect (hereafter referred to as “Remaining share subscription rights”) shall be provided with share subscription rights based on the conditions below for the public company as indicated in Article 236, Item 1, Number 8, (a) - (e) of the Corporation Law of Japan (hereafter referred to as “Reorganized Company”).

However, the provision of share subscription rights for the Reorganized Company in accordance with the conditions below shall occur only when such provision is specified in the absorption-type merger agreement, incorporation-type merger agreement, absorption-type split agreement, incorporation-type split plan, stock swap agreement, or stock transfer plan.

- (1) Number of share subscription rights for the Reorganized Company to be provided
The number of provided share subscription rights shall be the same as the number of Remaining share subscription rights possessed by the holder of the Remaining share subscription rights.
 - (2) Type of Reorganized Company shares issued upon exercise of the share subscription rights
The issued shares shall be common stock of the Reorganized Company.
 - (3) Number of Reorganized Company shares issued upon exercise of the share subscription rights
The number of issued shares shall be determined in accordance with "Number of shares issued upon exercise of stock acquisition rights" in the table above, with consideration for the conditions and other details of the Structural Reorganization.
 - (4) Amount to be paid by the holder of the share subscription right upon exercise of that right
The amount to be paid by the holder of the provided share subscription right upon exercise of that right shall be the amount calculated by multiplying the post-reorganization paid-in amount (determined by adjusting the Exercise Price with consideration for the conditions and other details of the Structural Reorganization) by the number of Reorganized Company shares issued upon exercise of the stock acquisition rights as determined according to (3) above.
 - (5) Period in which the share subscription rights can be exercised
The period shall be from either the later of the start date determined in "Exercise period for share subscription rights" above or the date on which the Structural Reorganization took effect until the end date determined in "Exercise period for stock acquisition rights" above.
 - (6) Restrictions on acquisition of share subscription rights by transfer
The acquisition of share subscription rights by transfer requires approval by a resolution of the Reorganized Company Board of Directors.
 - (7) Provisions for acquisition of the share subscription rights
This shall be determined in accordance with "Items related to the provisions for acquisition of share subscription rights" above.
5. If any of resolutions (1) - (5) listed below is approved by a General Meeting of Shareholders of the Company or, when a resolution of the General Meeting of Shareholders is not required, if a resolution by the Board of Directors or decision by a representative executive officer occurs, the Company shall be permitted to acquire share subscription rights at no cost on the date decided separately by the Board of Directors.
- (1) A resolution approving a merger agreement by which the Company becomes an extinct company
 - (2) A resolution approving a split agreement or split plan by which the Company becomes a split company
 - (3) A resolution approving a stock swap agreement or stock transfer plan by which the Company becomes a wholly owned subsidiary
 - (4) A resolution approving a change in the articles of incorporation in order to require approval by the Company for acquisition by means of stock transfer of any shares issued by the company
 - (5) A resolution approving a change in the articles of incorporation in order to require approval by the Company for acquisition by means of stock transfer of shares which were issued by the company upon exercise of share subscription rights, or in order for the Company to acquire all of this class of stock pursuant to a resolution by the General Meeting of Shareholders.

3 [Dividend policy]

The Company believes the most important management task for the Company is to enhance its corporate value and constantly distribute profits to shareholders through a business model of providing World's No. 1 products based on state-of-the-art technologies in growth fields.

The Company makes it a basic policy to distribute dividends from surplus twice annually (that is, an interim dividend and a year-end dividend). Dividends are determined with consideration for various factors, including consolidated business results, financial position, investments for business expansion, and shareholders' long-term prospects.

For FY2014, the Company paid ¥23 per share as the dividend, including an interim dividend (¥10 per share) paid on December 3rd, 2013.

Retained earnings will be used effectively for the capital investments that are indispensable for the growth of the Company, including research and development activities and production facilities.

The Company has included the following statement in its articles of incorporation. "Pursuant to a resolution of the Board of Directors, interim dividends may be paid to shareholders or registered pledges listed or recorded in the latest shareholder registry on September 30th of each year." The Board of Directors acts as the deciding body for the interim dividend, while the General Meeting of Shareholders acts as the deciding body for the year-end dividend.

(Note): Dividends from earned surplus for which the record date belongs to the current fiscal year are as follows.

(2) Internal audits and independent auditor audits

I. Organization, personnel, and procedures for internal audits and independent auditor audits

1. The Board of Auditors, as a parallel organization to the Board of Directors, is composed of 1 internal auditor and 3 external corporate auditors. Through means such as attending meetings of the Board of Directors and other important meetings, holding hearings concerning the status of business practices, and examining important financial documents, the members carry out audits related to the business practices, accounting processes, financial management, and other activities of the Company, checking for any actions which violate laws, regulations, or the duty of good faith.

2. The Audit dept. is a different internal auditing organization. This organization is overseen directly by the President, and is composed of 2 members. It is primarily tasked with checking compliance against laws and regulations, conforming to the articles of incorporation, and validating management actions through internal audit. If the Audit dept. finds any violation against laws, article of incorporation and /or regulations, the Audit dept. must immediately report to the Company's President and issue instructions for corrections.

II. Cooperation among internal audits, independent auditor audits, and accounting audits

When reviewing to determine whether or not the annual financial reports reflect the true status of the Company, the Board of Auditors receives reports and explanations from the accounting auditors. The Board of Auditors and the accounting auditors hold meetings for reporting and reviews related to matters such as accounting audit systems, plans, and operating conditions once every 2 months, working to maintain close cooperation. The Board of Auditors and the Audit dept. hold meetings for reporting and review once a month.

The auditors also comprise the members of the Advisory Committee, which assists the Chairperson of the Board of Directors. This committee advises on various topics of management. Upon request such as from the Board of Directors or Executive Officers Meeting, this committee may also provide advices for necessary actions within the Audit dept.

III. Auditors financial expertise

The auditors, especially external corporate auditors have significant knowledge of finance and accounting matters through their abundant corporate experience including working at the financial institutions.

(3) External corporate director and auditors

[Significant accounting policies]
(Basis of Presenting Consolidated Financial Statements)

1. Scope of consolidation

(1) Consolidated subsidiaries (13 companies)

Tosei Engineering Corp.
Tosei Systems Co., Ltd.
Accretech Create Corp.
Tosei Box Corp.
Accretech Finance Co., Ltd.
Accretech America Inc.
Accretech (Europe) GmbH
Accretech Korea Co., Ltd.
Accretech (China) Co., Ltd.
Tosei Engineering (Pinghu) Co., Ltd.
Accretech Taiwan Co., Ltd.
Accretech (Malaysia) Sdn Bhd.
Tosei (Thailand) Co., Ltd.

Tosei (Thailand) Co., Ltd., which was excluded from the consolidation range until FY2013, has been newly included to the consolidation range because effects on our financial statements became significant.

(2) Non- Consolidated subsidiaries

Accretech (Singapore) Pte, Ltd.
Tokyo Seimitsu (Thailand) Co., Ltd.
Accretech Vietnam Co., Ltd.
Tosei America, Inc.
Tosei Korea Co., Ltd.
Tosei Taiwan Co., Ltd.
Tosei Engineering Private Limited
PT TOSEI Indonesia
Tosei Engineering Malaysia Sdn. Bhd.
Tosei Philippines Corporation
Tosei Mexico S.A.DE.C.V
Tosei Brazil Engenharia E Representacao Comercial Ltda
Accretech (Pinghu) Co., Ltd.

All of the above 13 companies which were excluded from the consolidation range are all small companies, in terms of their total assets, total sales, total net income, total retained earnings, and others (amounts commensurate with our equity), and do not have a significant effect on our financial statements.

2. Equity Method

The equity method is not applied to any non-consolidated subsidiary

Non-consolidated subsidiaries where the equity method is not used all have an extremely small effect on the consolidated net income (depending on their equity), consolidated retained earnings (depending on their equity), and other financial amounts, and overall are of low importance. For these reasons, the equity method is not used for these companies, and a cost evaluation method is used instead for evaluation.

3. Accounting period of consolidated subsidiaries

The end-date of Fiscal term for Accretech (China) Co., Ltd., Tosei Engineering (Pinghu) Co., Ltd., and Tosei (Thailand) Co., Ltd. are at December 31st. In order to prepare this Consolidated Financial Statement, the Company applied statements of these subsidiaries as at December 31st. Any significant business transactions which were completed between their Fiscal end and the Company's Fiscal end were properly adjusted in the consolidated review. The end of the fiscal year for remaining consolidated subsidiaries matches the end of the consolidated fiscal year of the Company.

4. Significant accounting policies

(1) Valuation standards and methods for important assets

(A) Securities

Other securities

Marketable securities : Marketable securities classified as other securities are carried at fair value with any changes in unrealized holding gain or loss, net of the applicable income taxes, directly included in shareholders' equity. Costs of securities sold are calculated by the moving average method.

Non-marketable securities : Non-marketable securities classified as other securities are carried at cost determined by the moving average method.

(B) Inventories

Goods, finished products, materials, and supplies of the Company and its consolidated subsidiaries are stated at cost determined by the first-in, first-out method. Work in progress is stated at specific identification costs (using the method of devaluing the book price to reflect declines in profitability), however, external consolidated subsidiaries use the lower of cost determined by the first-in, first-out method.

(2) Depreciation of significant assets

(A) Tangible fixed assets (except leasing assets)

The Company and its consolidated subsidiaries use the declining balance method. However, the straight-line method is used for buildings (excluding equipment attached to buildings) which were acquired on or after April 1st, 1998.

External consolidated subsidiaries use the straight-line method.

The significant useful lives are as follows.

Buildings and structures 3 - 50 years

Machinery and equipment 2 - 11 years

(B) Intangible fixed assets (except lease assets)

Goodwill is amortized using a straight-line method. Software for use by the Company is depreciated using a straight-line method based on the estimated life at the Company. Other intangible fixed assets are depreciated using the straight-line method.

(C) Lease assets

Lease assets (Financial leases other than those deemed to transfer ownership of properties to lessees) is depreciated using the straight-line method under leasing term to be considered as useful lives.

(3) Basis for significant reserves

- (A) Allowance for doubtful accounts
 - For covering probable losses on collection of receivables, the allowance for doubtful accounts is calculated based on past experience for ordinary receivables. For companies in financial difficulties, it is based on individual estimates of the collectability of receivables, and consists of the amount estimated to be uncollectible.
- (B) Allowance for bonuses
 - The Company and its domestic consolidated subsidiaries calculate the allowance for bonuses to employees based on the expected amount of payment.
- (C) Accrued director's bonuses
 - The Company's domestic consolidated subsidiaries calculate the allowance for bonuses to directors based on the expected amount of payment during that consolidated fiscal year.
- (D) Accrued director's retirement benefits
 - Domestic consolidated subsidiaries calculate the allowance for payment of director retirement benefits that are forecasted to occur upon director retirement. For this purpose, the expected amount of payment at the end of the fiscal year is calculated based on internal regulations.
- (4) Accounting Method for retirement obligations
 - (A) Method of periodic attribution of the estimated amount of retirement benefits
 - The attribution of estimated amounts for the current Fiscal year is based on the fixed amount method.
 - (B) Actuarial gain or loss, and Prior service cost
 - For actuarial gains and losses, proportional amounts are amortized beginning from the consolidated fiscal year following the next fiscal year in which it occurs, using a fixed number of years (10) that is within the average estimated remaining service time of the employees for each consolidated fiscal year. For Prior service cost, proportional amounts are amortized beginning from the consolidated fiscal year in which it occurs, using a fixed number of years (10) that is within the average estimated remaining service time of the employees for each consolidated fiscal year.
- (5) Standard of Foreign currency translation of significant foreign currency based assets/liabilities
 - Receivables and payables denominated in foreign currencies are translated into yen at the rate of exchange in effect on the balance sheet date, and differences arising from the translation are processed as gains or losses.
- (6) Amortization of goodwill
 - Amortization of goodwill is evaluated for each acquisition, and is carried out over a reasonable number of years (7 or 10 years).
- (7) Cash and cash equivalents in the consolidated statements of cash flows
 - Cash and cash equivalents in the consolidated statements consist of cash on hand, available funds on deposit, and short-term, highly liquid investments that are readily convertible to cash, with original maturities of three months or less, and that are substantially free of price fluctuation risk.
- (8) Other significant accounting policies
 - (A) Accounting for consumption tax
 - Transactions subject to national and local consumption taxes are recorded as amounts exclusive of consumption tax.
 - (B) Consolidated tax-reporting
 - The Company Group applies consolidated tax-reporting system.

[Changes in accounting principles]

The Company group applies the "Accounting Standard for Retirement Benefits" (ASBJ Statement No.26, May 17th, 2012, except contents of paragraph 35) (hereinafter referred to as the "Accounting Standard"), and "Guidance on Accounting Standard for Retirement Benefits" (ASBJ Guidance No.25, May 17th, 2012, except paragraph 67) (hereinafter referred to as the "Guidance") from the end of the FY2014. This guidance subtracts Plan assets from Retirement benefit obligations as Net defined benefit liabilities. In addition, actuarial gains and losses and past service costs are also to be calculated as net benefit assets and liabilities. If Plan assets exceed Net defined benefit liabilities, then it is accounted for as Net defined benefit assets.

In applying the new Accounting Standard, adjustments have been made to Comprehensive Income and the Consolidated Cash Flows statements.

As a result of these changes in accounting policy, in FY2014, ¥2.187 billion of Net defined assets and ¥1.111 billion of Net defined liabilities were allocated. In addition, Total accumulated other comprehensive income increased by ¥683 million. The effect on per share information is described in the appropriate statement.

[Changes in presentation]

(Consolidated statements of income)

In FY2013, "Selling Expenses" and "General Expenses" were separately listed in the "Total Selling, General and Administrative Expenses." However, it was listed under the single title of "Selling, General and Administrative Expenses" in FY2014. Accordingly, applicable accounts in the consolidated financial statement for FY2013 have been denotatively reclassified.

(Investment securities)

1. Status of Financial Instruments

(1) System for managing financial instruments in the Company Group

The Company Group accommodates long-term finances based on the forecast of Group investments for SPE and Metrology business mainly by loans from banks. Short term finance is derived mainly by loans from banks, and temporarily unused funds are managed with low-risk financial assets. Derivatives are only to be applied for the purpose of risk management, and not applied for speculative purposes.

(2) Detail and risk of Financial Instruments

Trade notes and accounts receivable face reliability risks of these customers and foreign-currency based bonds though the Group's global business also face foreign currency risk. Investment securities, mainly stocks related to correspondent companies or capital and business alliances, therefore face market price fluctuation risk.

Liabilities such as trade notes and accounts payables are mostly consistent with current face values. Although these liabilities face interest rate fluctuation risk because interest on loans and leasing bonds are set to variable rates, this is hedged by interest rate swaps.

(3) Risk management for Financial Instruments

(A) Credit risk management (risk of client's breach of contract)

The Company controls trade notes and balances and due dates per each client working with both Accounting dept. and Sales dept. in order to assess the financial status of each client and avoid contract breach risk. The consolidated subsidiaries apply same method for credit risk management.

(B) Market risk management (risk of fluctuation in exchange rates or interest rates)

The Company periodically checks market prices of investment securities and the financial status of those who issued these securities. In parallel, the amount of holding investment securities is also reviewed and revised as necessary based on the conditions of trade between the Company and those who issued these securities. In addition, in order to hedge interest rate fluctuations, interest rate swaps are applied.

In relation to the purchase of derivatives, the Company authorizes delegates from the Accounting dept. to make market transactions to meet the hedging requirements of the originating business area. Further risk management of these derivatives is handled by the Management Support dept. in accordance with our policy on "Regulation of derivatives". Details of all outstanding contracts including details of transactions, class, and balances are reported through the Management Support dept. to the Representative Director.

(C) Liquidity risk management in financing operations

To manage liquidity risk, Accounting dept. of the Company generates and revises financial plans as necessary to keep short-term liquidity to appropriate levels based on business activity forecasts. The consolidated subsidiaries apply same method for liquidity risk management.

(4) Additional information for the current value of Financial Instruments

Current value of Financial Instruments includes not only the value based on a current market price (or the reasonably calculated value if market price does not exist), but is also formulated using an allowance for price fluctuations that may affect expected market value.

2. Current Value of Financial Instruments

Accounted value on Balance Sheet, Current Value and balance are as follows.

(Segment information)

1. Overview of reportable segments

(1) Method of defining reportable segments

The reportable segments of the Company are the business segments for which separate financial information can be obtained and are at the level where the Company's board of directors conducts periodic reviews leading to the allocation of resources and evaluation of business performance.

The Company consists of internal companies known as the Semiconductor Company and the Metrology Company, and each company's products and services are managed under comprehensive strategies inside and outside of Japan.

Therefore, the Company defines "SPE" and "Metrology Equipment" as reportable segments based on the intercompany system and their outputs.

The "SPE" consists of manufacturing and sales of process and inspection equipment to be applied to Semiconductor Manufacturing Processes and the "Metrology Equipment" consists of manufacturing and sales of precision measurement equipment such as 3D coordinate measuring machines, surface texture and contour measuring instruments.

(2) Primary products of each reportable segment

SPE segment: Wafer probing machines, wafer dicing machines, polish grinders, wafer manufacturing machines, CMPs, precision dicing blades

Metrology segment: 3D coordinate measuring machines, roundness and cylindrical profile Measuring instruments, surface texture and contour measuring instruments, machine control gauges, various automated measuring, sorting, and assembling machines

2. Method of calculation of sales, profit/loss, assets/liabilities and/or others in reportable segments

The method of calculating segment results is mostly the same as applied to the consolidated financial statements. Therefore, segment profit is based on consolidated operating income.

3. Net sales, profit/loss, assets/liabilities and/or others in reportable segments
